*At the intersection of experience and technology.*

# ***GULF UNMANNED SYSTEMS CENTER***

Gulf Unmanned Systems Center (*or, GUSC*) features private facilities on Florida's central gulf coast that enable integrated testing and training for -all- unmanned systems domains. GUSC's ranges offer 250,000+ acres including environments perfect for riverine, coastal and jungle training as well as tactics development.

Nexutech's efforts have recently resulted in GUSC forming a partnership with a team from Florida Atlantic University (*FAU*) to test a new unmanned surface vehicle (*USV*) to be used for bridge assessments. *Our well-connected industry leaders can help you find synergies !*
