Moderator / Speaker Bio: Mr Jason Haines, Nexus Technology Services

Mr. Jason Haines is an operationally experienced subject matter expert in unmanned systems integration within complex operating environments. He commanded the only active-duty UAS Squadrons in the Navy (after VC-6 was disestablished) for Naval Special Warfare, and led cutting-edge solutions for requirements development, program management, training oversight, and the successful operational deployments in support of SOCOM and JSOC.

His focused work in the last decade to fuse non-weaponized UAS solutions into Stability Operations, Precision Agriculture, Socio-Cultural Analysis has made profound effects for industry and society. He currently supports AUVSI as the STEM Coordinator for the State of Virginia through the Hampton Roads Chapter, and is active in several professional organizations for maritime, aviation, & community advancements to include the last three years of supporting creation of Mid-Atlantic Aviation Partnership.

Mr. Haines has over a quarter century of public service with forestry, rescue, firefighting, naval service, and over a decade of business management experience in California, Oregon, & Texas. With extensive naval experience in submarines, surface warfare, aviation, expeditionary irregular warfare and special operations, Mr. Haines led many Unmanned Systems advancements as Operations Director of PATRIOT SEVEN for the Under Secretary of the Air Force; organizational program manager for Naval Special Warfare Unmanned Systems, Technical Special Reconnaissance and Director for Joint Fires, ISR & Air Operations in various theaters. Mr. Haines has spent several years researching and developing multi-faceted solutions that focus on the fusion of technology with socio-cultural understanding in support of Counter-Illicit Transnational Activities & Cooperative Solutions for Global Stability through non-militarized means, such as socio-economic improvements of precision agriculture & famine mitigation, marine environmental monitoring, forestry & resource management, public safety, humanitarian and disaster aid. His most recent hobby interest includes fusion of AUVSI with the International Stability Operations Association (ISOA); adaptation of Socio-Cultural Analysis (SCA) for improving community engagement and development; and efforts to ensure that the 'proper regulations not restrictions' for autonomous or unmanned systems are appropriately enforced to protect civil privacy and Constitutional rights.
